EXECUTIVE SUMMARY

Global Green is a professional wealth management company with emphasis on Wealth Creation and Digital Assets across wide range of traditional and alternative investment options, including fixed income securities.

Our indefinitely scalable investment plans aim at equipping our traders with the best tools possible. This is achieved through channelling the advances in computer learning, processing power and network capacity into streamlining and improving all aspects of the trading operations, from front office to settlements. This is paired with meticulous/attentive execution and conservative risk management.

The capital of the funds not traded is securely stored in multiple Ledger cold wallets, which keeps the security standards at the highest level as we aim at protecting our clients from any possible inconvenience.

We trade on cryptocurrency, Real Estate, Forex, and Cannabis. With some great team work, periodically using the market surges & bullish movements effectively we're obliged to acquire more percentage profits than a stable market condition.

We're making very good use of margin trading to stay clear out of risk.
