## ABSTRACT

With a focus on creating true global in-discriminatory economic growth, organizations, entrepreneurs, and investors need a sustainable ecosystem free from the influence of regulatory agencies and malicious third-parties. As companies seek ways to raise capital through ICOs, streamline operations by using blockchains, enhance growth, and increase profitability, they need to determine the advantages of establishing and managing a business in different locations worldwide. Most significant barriers they face are hiring local talent, keeping up with innovation, the increased cost of operating in foreign countries, corporate taxes, and government regulations.

This document highlights the benefits of creating a business-oriented means with **Cryptotrade**, a subclass of **CRYPTOTRADE GROUP LTD**, on a decentralized network with Proof of Performance (PoP) incentive mechanism, its governance, management tools and an alignment system built on top of the **Cryptotrade**'s blockchain. CRYPTOTRADE GROUP LTD governance is regulated by a **CRYPTOTRADE**'s Platform, which is designed to be a self-sustainable decentralized ecosystem consisting of businesses motivated to participate and reap the rewards of their success without geographical restrictions or limitations. Initially, the **CRYPTOTRADE**'s Platform will be designed specifically for profit-driven companies but is modular enough to accommodate other types of organizations.

### About this document

This document does not constitute an offer of securities, promotion, invitation or solicitation for investment purposes. This document and any other documents published in association with this white paper relate to a potential token offering to persons (contributors) in respect of the intended development and use of the network by various participants. The terms of the contribution are not therefore intended to be a financial service offering document or a prospectus.

The token offering involves and relates to the development and use of experimental software and technologies that may not come to fruition or achieve the objectives specified in the white paper.

The token is therefore not intended to represent any form of security interest.

# BITCOIN: A Brief History

October 31 marks the ten year anniversary of the release of the [Bitcoin white paper](#), which was authored by [Satoshi Nakamoto](#), and whose identity still remains a mystery.

In this relatively short period of time, Bitcoin has challenged the way modern society looks at global finance and banking, and has been the catalyst for the birth of over a thousand different [cryptocurrencies](#) as well as many more [blockchain](#) projects. Its history has been full of highs and lows, as the volatile cryptocurrency has battled through years fraught with controversy and success. With the release of the white paper, a movement was set in motion that has left an indelible mark across a [multitude of industries](#).

Coin telegraph takes a look at some of the most memorable and an infamous moment over the 10 years since Bitcoin was brought to life.

## Formative years

On Aug. 18, 2008, the Bitcoin.org domain was registered by an anonymous entity as a precursor to the body of work that would describe the intricacies of the Bitcoin protocol.

This came to life with the publishing of the Bitcoin white paper on Oct. 31, 2008. Titled "[Bitcoin - A peer-to-peer electronic cash system](#)," the initial nine page document was distributed on cypherpunk mailing list in November 2008.

On Jan. 3, 2009, Nakamoto successfully created the [Genesis Block](#), the founding block of the Bitcoin blockchain. The Genesis block was hardcoded into the Bitcoin software and the 50 BTC, which were created, [cannot be spent](#) due to the way the code was written. The exact reasons for this aren't known, just another mystery to add to Satoshi's story.

The average time between the creation of new blocks is 10 minutes, but it took a full six days before the next block was added to the Bitcoin blockchain, according to the timestamps of those specific blocks.

# Bitcoin Trading

Bitcoin Trading as a major part of **Digital Currency Exchange (DCE)** is a form of crypto-assets oriented business which allows Investors, Clients and Customers to exchange cryptocurrencies, electronic or digital currencies for other assets, such as **conventional fiat money** or other digital currencies.

The process of adding these trading transaction records to Bitcoin's public ledger of past transactions is called "mining" (and a "[mining rig](#)" is a colloquial metaphor for a single computer system that performs the necessary computations for "mining"). This ledger of past transactions is called the [block chain](#) as it is a chain of [blocks](#). The blockchain serves to confirm transactions to the rest of the network as having taken place. Bitcoin nodes use the blockchain to distinguish legitimate Bitcoin transactions from attempts to re-spend coins that have already been spent elsewhere.

The primary purpose of mining is to set the history of transactions in a way that is [computationally impractical to modify by any one entity](#). By downloading and verifying the blockchain, bitcoin [nodes](#) are able to reach consensus about the ordering of events in bitcoin.

Bitcoin Trading and Exchange here at [Cryptotrade](#) is simply the investing, buying and selling of bitcoin through our secured and AI-Guided protocol both internally or externally and adding a new dimension to currency trading with our very own dynamic force and the cryptocurrencies' volatility it experiences as it settles into the global market. [Cryptotrade](#) is the market-maker that typically takes the bid-ask spreads as a transaction commission for its service or, as a matching platform, simply charges fees. This both serves the purpose of disseminating new coins in a decentralized manner as well as motivating people to provide security for the system.

Bitcoin Trading is so called because it looks like as the ordinary exchange processes but in a very advanced form.

## What/Who is CRYPTOTRADE?

Cryptotrade is an entity created and operated on trading the decentralized digital ledger by one or multiple human or Autonomous Agent - owners or a mixture of both that share a common purpose and unites in order to focus their various talents and organize their collectively available skills or resources to achieve specific, declared goals by using the most efficient techno-mechanisms required.

The decentralized company owns capital and other, primary digital, assets. It can also collaborate with other partners or businesses inside and outside of the decentralized network – making it a highly versatile entity.

Such a company exists as long as it is able to self-update its most basic components and continue being recognized as the same entity or until it decides to terminate its existence. CRYPTOTRADE GROUP LTD can use a CRYPTOTRADE extension for better recognition in forms: *Cryptotrade* – ".club", ".org", ".io", ".trade" or ".exchange" etcetera.

## Why Choose CRYPTOTRADE /CRYPTOTRADE GROUP LTD?

- Fast and automated processing (Trading and Investments) and Transactions: CRYPTOTRADE provide(s )an arbitration system for any given Trading, Investment or Exchange of Crypto-assets between two parties (itself and another) which allows arbitrators to have all sorts of transactions processed very quickly.
- Fast and automated dispute resolution: CRYPTOTRADE also provides an arbitration system for any given dispute between two parties which allows arbitrators to resolve the dispute based on documents provided by the applicant and defendant very quickly as well.
- Liability fund that can cover the company's debts or liabilities: Liability Fund is liability coverage in case of the CRYPTOTRADE's debts or liabilities. It is created as a percentage from a received payment that is stored on a separate wallet until certain limits are reached.
- Transparency: Ownership in public CRYPTOTRADE organization is transparent and transferable. Voting token holdings are public, and owners have the right to transfer ownership to another party.

There are three transparent functions of ownership built into public CRYPTOTRADE:

- i. Issue equity tokens, arbitrarily or with parameters.
- ii. Sell or transfer tokens.
- iii. Issue new non-voting tokens.

# THE DESIGN OF CRYPTOTRADE GROUP LTD

## Company Profile

Detailed Profile of **Cryptotrade Ltd** as entered and registered under the **Registrar of Companies (RoC)**, England and Wales.

# STRATEGIES OF GROWING ASSETS

The right combination of stocks – trading/exchange, investment and affiliate programs allowed the portfolio to grow without much risks and volatility than a portfolio that is solely dependent on just trading or either of the above mentioned means here in [Cryptotrade.club](#)

Diversification works partly because when one asset class is performing poorly, another is being progressive.

# Getting Started

## How do I start?

Getting started with us is as simple as reciting your A, B, C and your numeral figures.

First Off, visit our homepage at: [www.cryptotrade.club](http://www.cryptotrade.club). Go through this very page as on there are most of the needful information which will guide you through your trades and investments with us, particularly as a first-timer or novice.

Click on the “**Get Started**” icon bar on our homepage and you will be directed to our registration page.

On this page, enter the needful details as it is required of you and ensure they are true.

(It is advised that the entered details are crosschecked again and again before proceeding further to clicking on the “**Register**” icon.

This is because these same details will be required from you as time goes on for security and verification purposes so as to run a synchronizing algorithm to match the already existing details as entered in our server.)

Once you are done entering the details, click on “**Register**” and wait for few seconds as you will be directed immediately to your personal dashboard from which you could conduct and trading or investment process(es).

## Have an already existing account already? Let's Login!

This process is similar to the previously explained but a little bit different. **What's the difference?** This very process is for already existing users to log into their account to conduct any transactions (- internally or externally).

Again, visit our homepage at: [www.cryptotrade.club](http://www.cryptotrade.club).

Click on

(the double arrow direction icon) on the webpage and scroll down.

This automatically directs you to our **Login** page.

(Or Click on this **Login** option on the bottom of our homepage as you scroll down and in seconds, you will be directed to a page.)

On this page which you have been redirected to, enter your details as required with regards to the same details you entered in your startup.

Enter these details and ensure they are correct so as to save you time and improve the accessibility, workability & security of your account.

When you are done filling the required fields, click on "**Login**" and you will be directed to your personal dashboard where you could run all your trading and investment processes (Deposit, Withdrawal, et al)

## TRADING PLANS, INVESTMENT PRICES AND RETURNS (in %)

# How does it work?

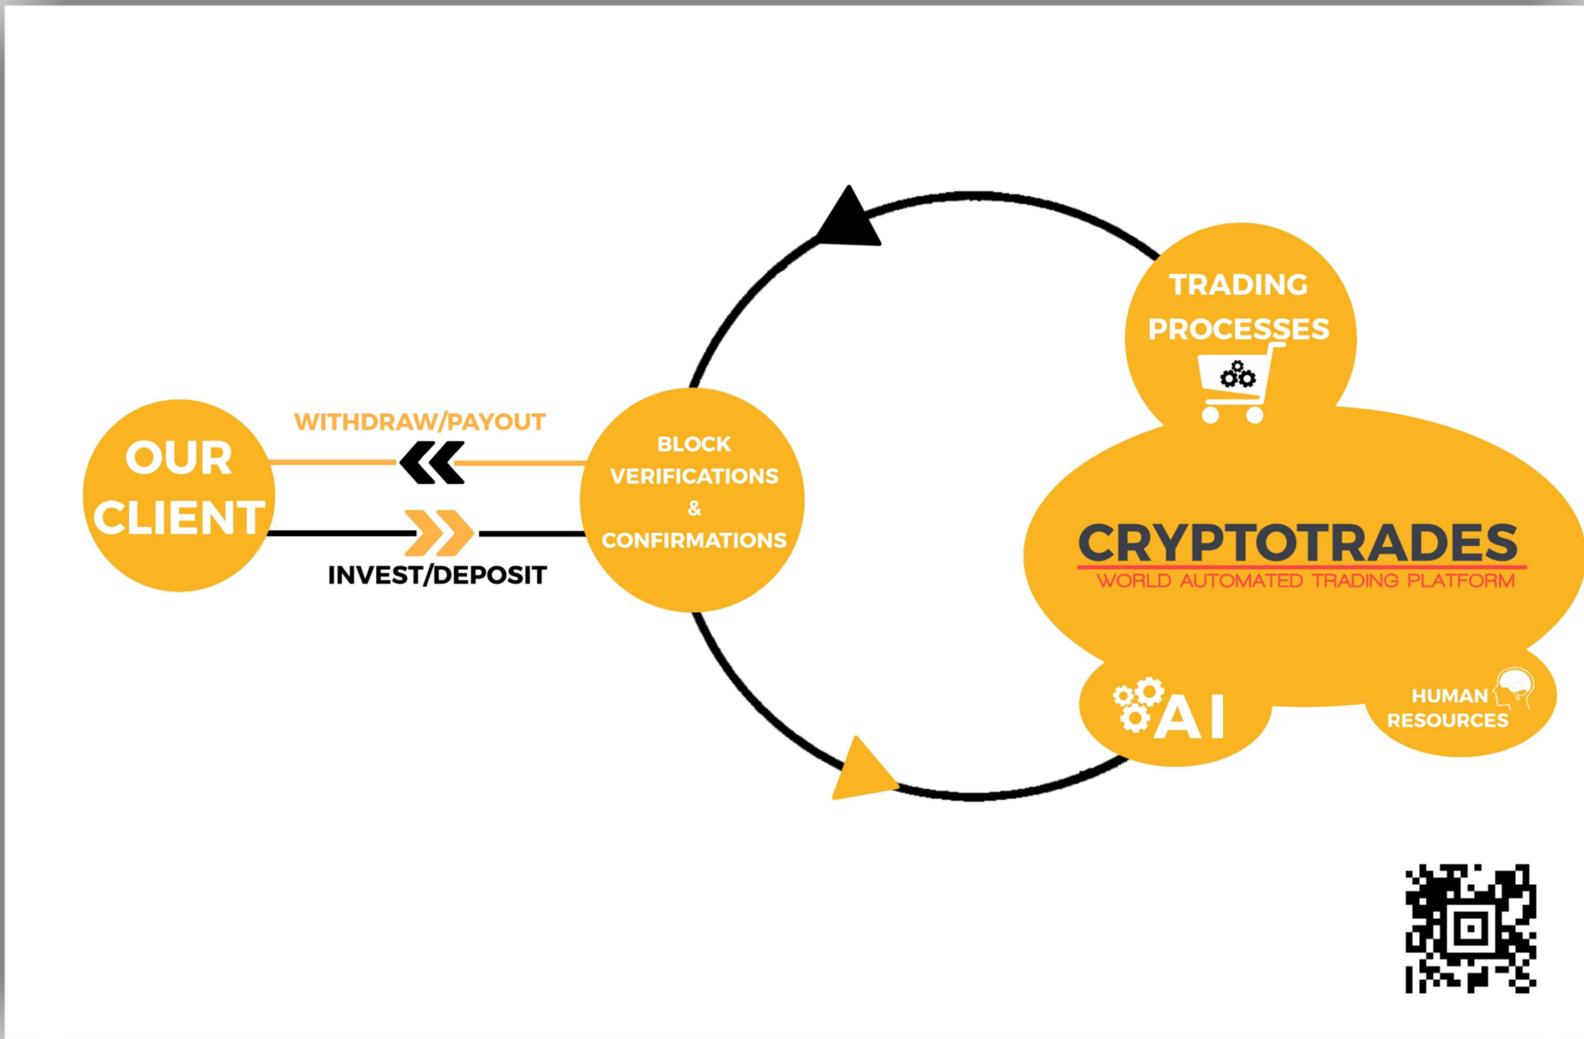

In Plan 01 using the normal trading principles and relating to trading plan and algorithm; a minimum trade/investment of 20.00 USD and a maximum of 1,000.00 USD, you earn your profits/interests (Principal Inclusive) of 12% within a period of twenty-four hours (24 Hours) of which your earnings are sent directly into your personal wallet when it is due or re-invested into the same or another trading plan depending on the quantity or amount.

The whole trading setup is FREE and costs nothing despite it runs on an AI - Integrated Algorithm, the most powerfully rated, trusted and known trading algorithm available in the market. On the best part of it, a discount of 4% is awarded for any transaction in our ultimate plan and an almost negligible maintenance fee is charged per transaction.

(All Trading Process are Same & Applies to All Trading Plans with due Regards to Their Minimums)

## What it looks like trading with Us

Being as easy as reciting A, B, C and your numeral figures, trading with us is illustrated thus;

# ROAD MAP

## First Off (Mar. 2020),

Introducing a better and AI – Integrated and guided mining and investment protocols with the sole aim of eliminating all constraints of faults which may arise as a result of having the fallible human dealing with it.

## Secondly (Apr. 2020),

Maintaining a proper path of Our Jointly growing Assets in a positive course - proper and expertise assessment, collection and documentation of generated funds for reference and other book-keeping purposes in the near future.

## Next (May 2020),

Introducing our very own Debit/Credit cards for International ATMs and transactions for all our clients on the ultimate trading package.

## Next (Jun. 2020),

Organizing orientation programs and seminars internationally so as to spark up interest, nurse the interest and enlighten the general public on the need to have 65% of their assets invest in Crypto with us.

## Finally (Sept. 2020),

Introducing AI – Robotics integrated means in our already existing means of income generation and build-up for our clients and investors.

# APPENDIX

## ABOUT CRYPTOTRADE GROUP LTD

Found on the 18<sup>th</sup> day of October, 2017 **Cryptotrade** Group LTD is a trading/exchange and investment company which specializes in offering trading atmosphere & services for Bitcoin, Ethereum, Bitcoin Cash, and Litecoin. Although the company has just launched their business, we aim to become one of the leading exchange and investment providers in the world, offering cryptocurrency trading capacities in every range - for newcomers, interested home traders, as well as large scale investors.

**Our Vision** is to make cryptocurrency trading easy and fast for everyone.

We provide a multi-algorithm, multi-coin trading service using the latest technology - without any unexplained fees. The ultimate goal of our existence is to make cryptocurrency trading and exchange an easy, smart and rewarding experience for all.

**Our Mission** task is to extract the largest possible profit from exchange operations at crypto-currency trading markets. We can guarantee a stable inflow of profits, as we are always searching for new, more appealing and profitable operation methods.
